

What's New in SALT 20?

- **New menu organization**

Analyze and Database menus are organized into language domains: macro analysis, syntax/morphology, semantics, discourse, verbal facility, and errors. This organization, which corresponds to the organization of the *Standard Measures Report*, facilitates locating additional, more detailed information in areas of interest.

- **New report**

Quick Look report provides a visual display of strengths and weaknesses.

QUICK LOOK			
Compared to 24 Samples Equated By Same Number of Total Words			
LANGUAGE MEASURE	Strength	WNL	Weakness
SYNTAX/MORPHOLOGY			
MLU in Words		X	
% Utterances With Verbs		X	
SEMANTICS			
Moving-Average NDW		X	
DISCOURSE			
% Responses to Questions		X	
% Utrs With Overlapping Speech	X		
VERBAL FACILITY			
Words per Minute			X
Pause Time As % of Total Time		X	
Maze Words As % of Total Words			X
% Abandoned Utterances	X		
ERRORS			
% Utterances With Errors		X	

- **New report organization**

The reports have been re-organized by language domain. There is a summary report for each domain with additional domain-specific reports for most categories. For example, the *Verbal Facility Summary* contains details about rate, pauses, mazes, and abandoned utterances. The *Maze Distribution Tables* provide even more details related to mazes.

Measures in the database reports may be compared to all age or grade-matched peers, or to the subset of database samples equated by length.

- **New variables**

- Syntax/Morphology
 - % Utterances with Verbs
 - List of Bound Morphemes Used (included in summary report)
- Semantics
 - Moving-Average NDW
 - Number of Different Bound Morphemes
- Verbal Fluency
 - Total Maze Components
 - Maze Components as % of Total Components
 - % Abandoned Utterances
- Errors
 - List of Error Codes (included in summary report)

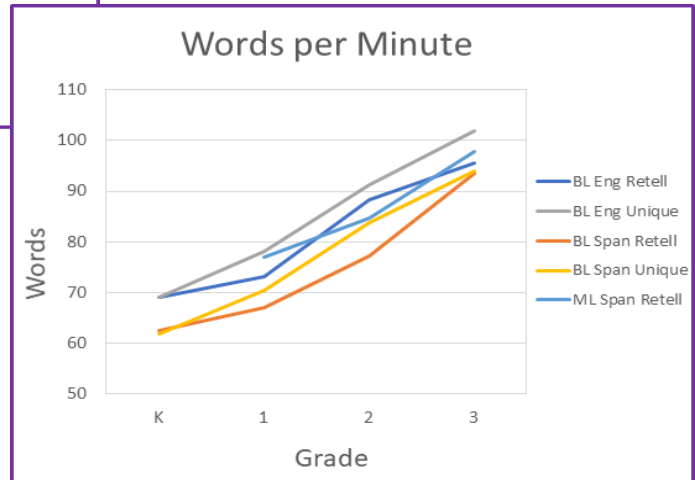

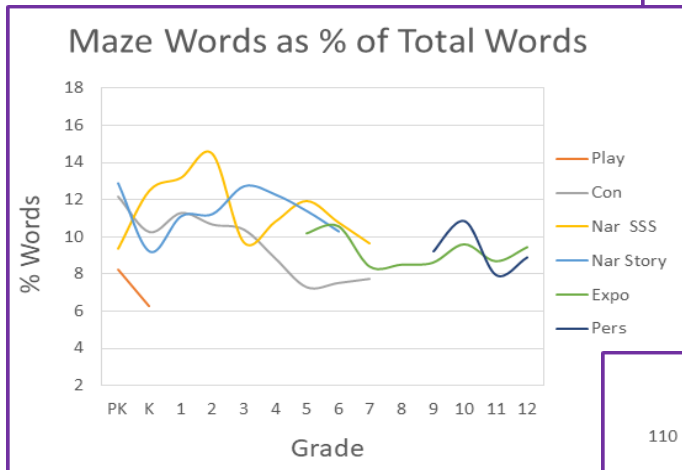

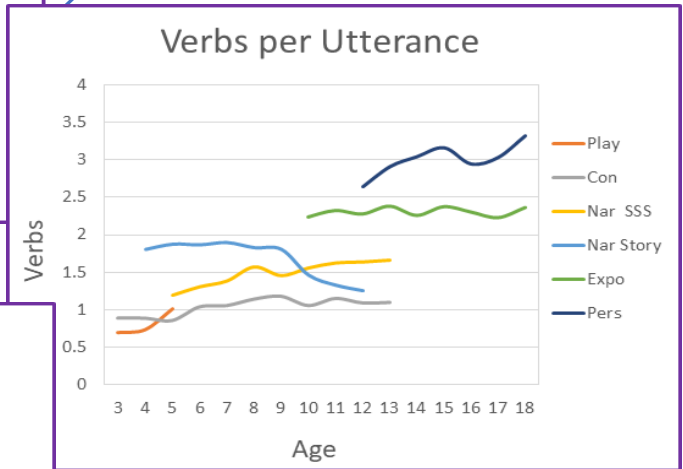

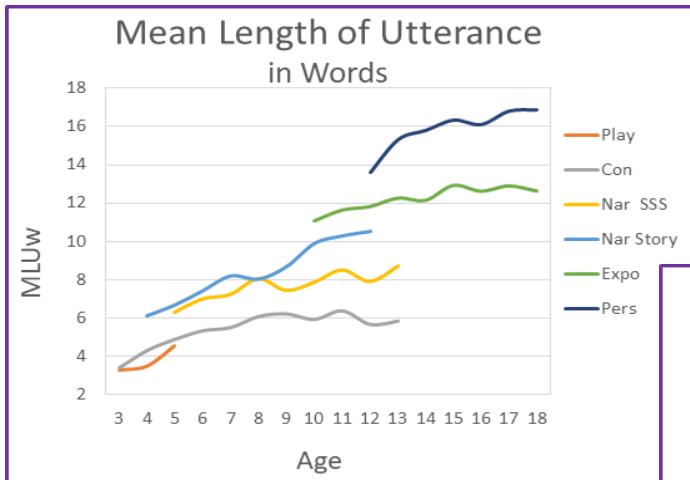

- **New reference database**

TNL2 Narrative Samples – 778 children, ranging in age from 4;0 to 14;11, in grades PK, K, 1-8. These samples were collected for the standardization of the Test of Narrative Language - Second Edition (Gillam & Pearson, 2017).

- **Expanded transcription convention**

@begin/@end sets now allowed throughout your transcript to easily select multiple sections for analysis.

- **Normative graphs generated from the SALT reference databases**
 - Fifty-eight (58) graphs, provided as PDFs, can be accessed from the Help menu.
 - Great reference, especially for samples without database comparison.

English-fluent

Spanish/English participants

- **More resources added as PDFs to the Help menu**
 - Transcription conventions for C-unit segmentation, written samples, and fluency coding
 - Scoring guides for SI, NSS, ESS, PSS, and ONQ
 - Detailed protocols and materials for all the reference databases
- **Research version only**
 - Updated the *Rectangular Data File* utility
 - includes new variables
 - reflects the new menu and report organization
